

The Incubation Period

Sartwell's Law

Incubation periods for diseases tend to be distributed as lognormals; more generally, they will be right-skewed.

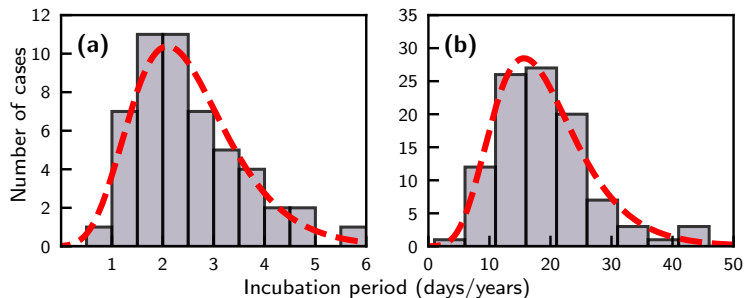

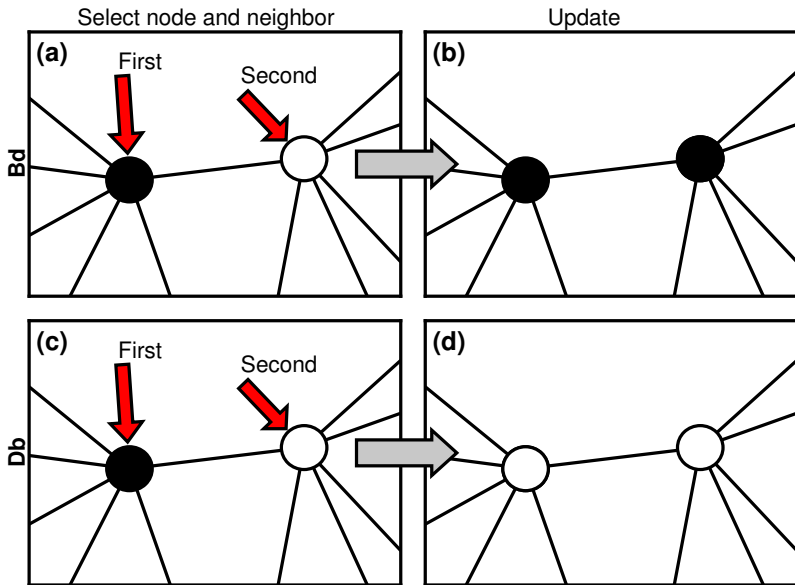

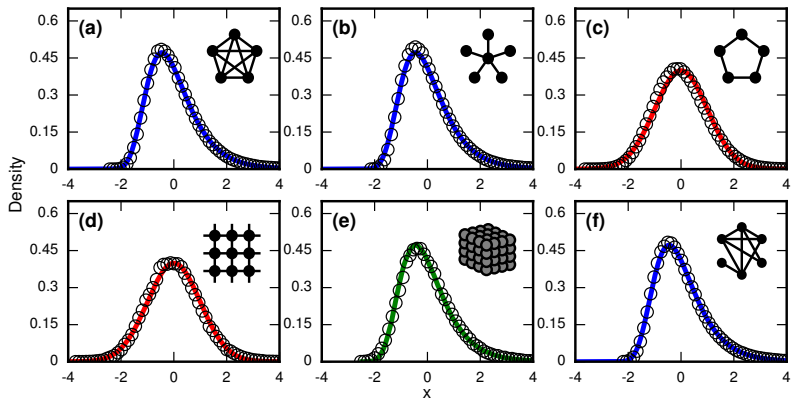

Figure: (a) Food-borne streptococcal sore throat (Sartwell, 1950).
(b) Occupation-induced bladder tumors (Goldblatt, 1949).

The Moran Model

Changing the network can change the distribution ...

... but so can small details.
